Section:03

WHAT IS ARCHIEPLANER ?

- Archieplaner is designed to support architecture students in their design projects.
- It offers a vast catalog of architectural references compatible with popular software like AutoCAD, Revit, and Rhino.
- The website simplifies the process of searching and downloading crucial design elements for architecture students.

ROLES

01 Gabrielle Mojena: Project Manager and researcher

02 Colman Brackin: Quality Assurance (QA) Specialist/Tester and editor

PROJECT PLAN

01

Research

02

Create a Mockup

03

Create a home page HTML

04

Create CSS

05

Organize Info For The Catalogs

06

Create the AutoCAD HTML

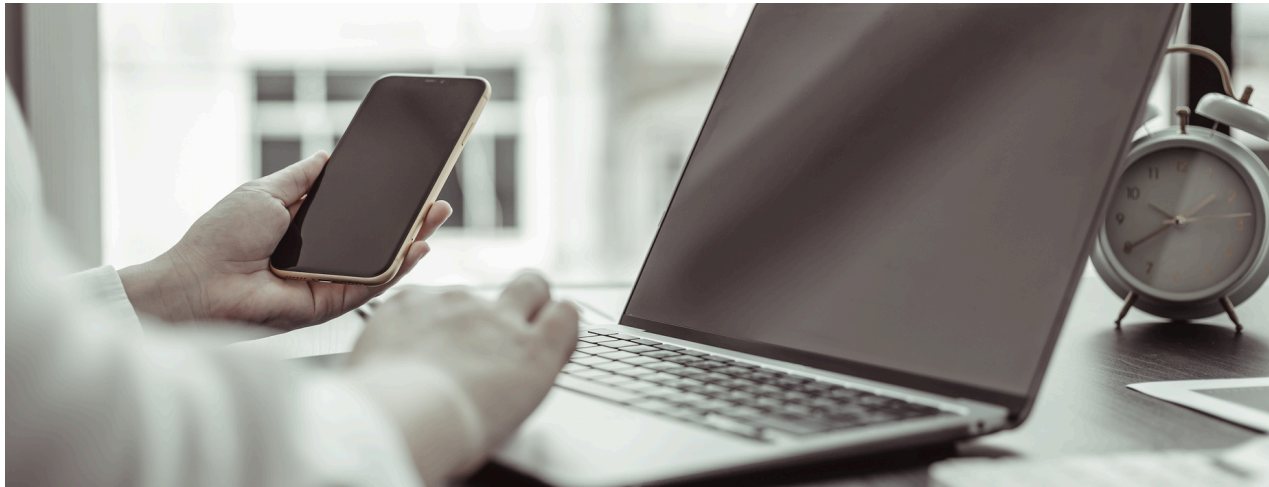

07

incorporate Bootstrap and
Java-script

08

Test run the website

RESEARCH

01

Info For The Catalogs

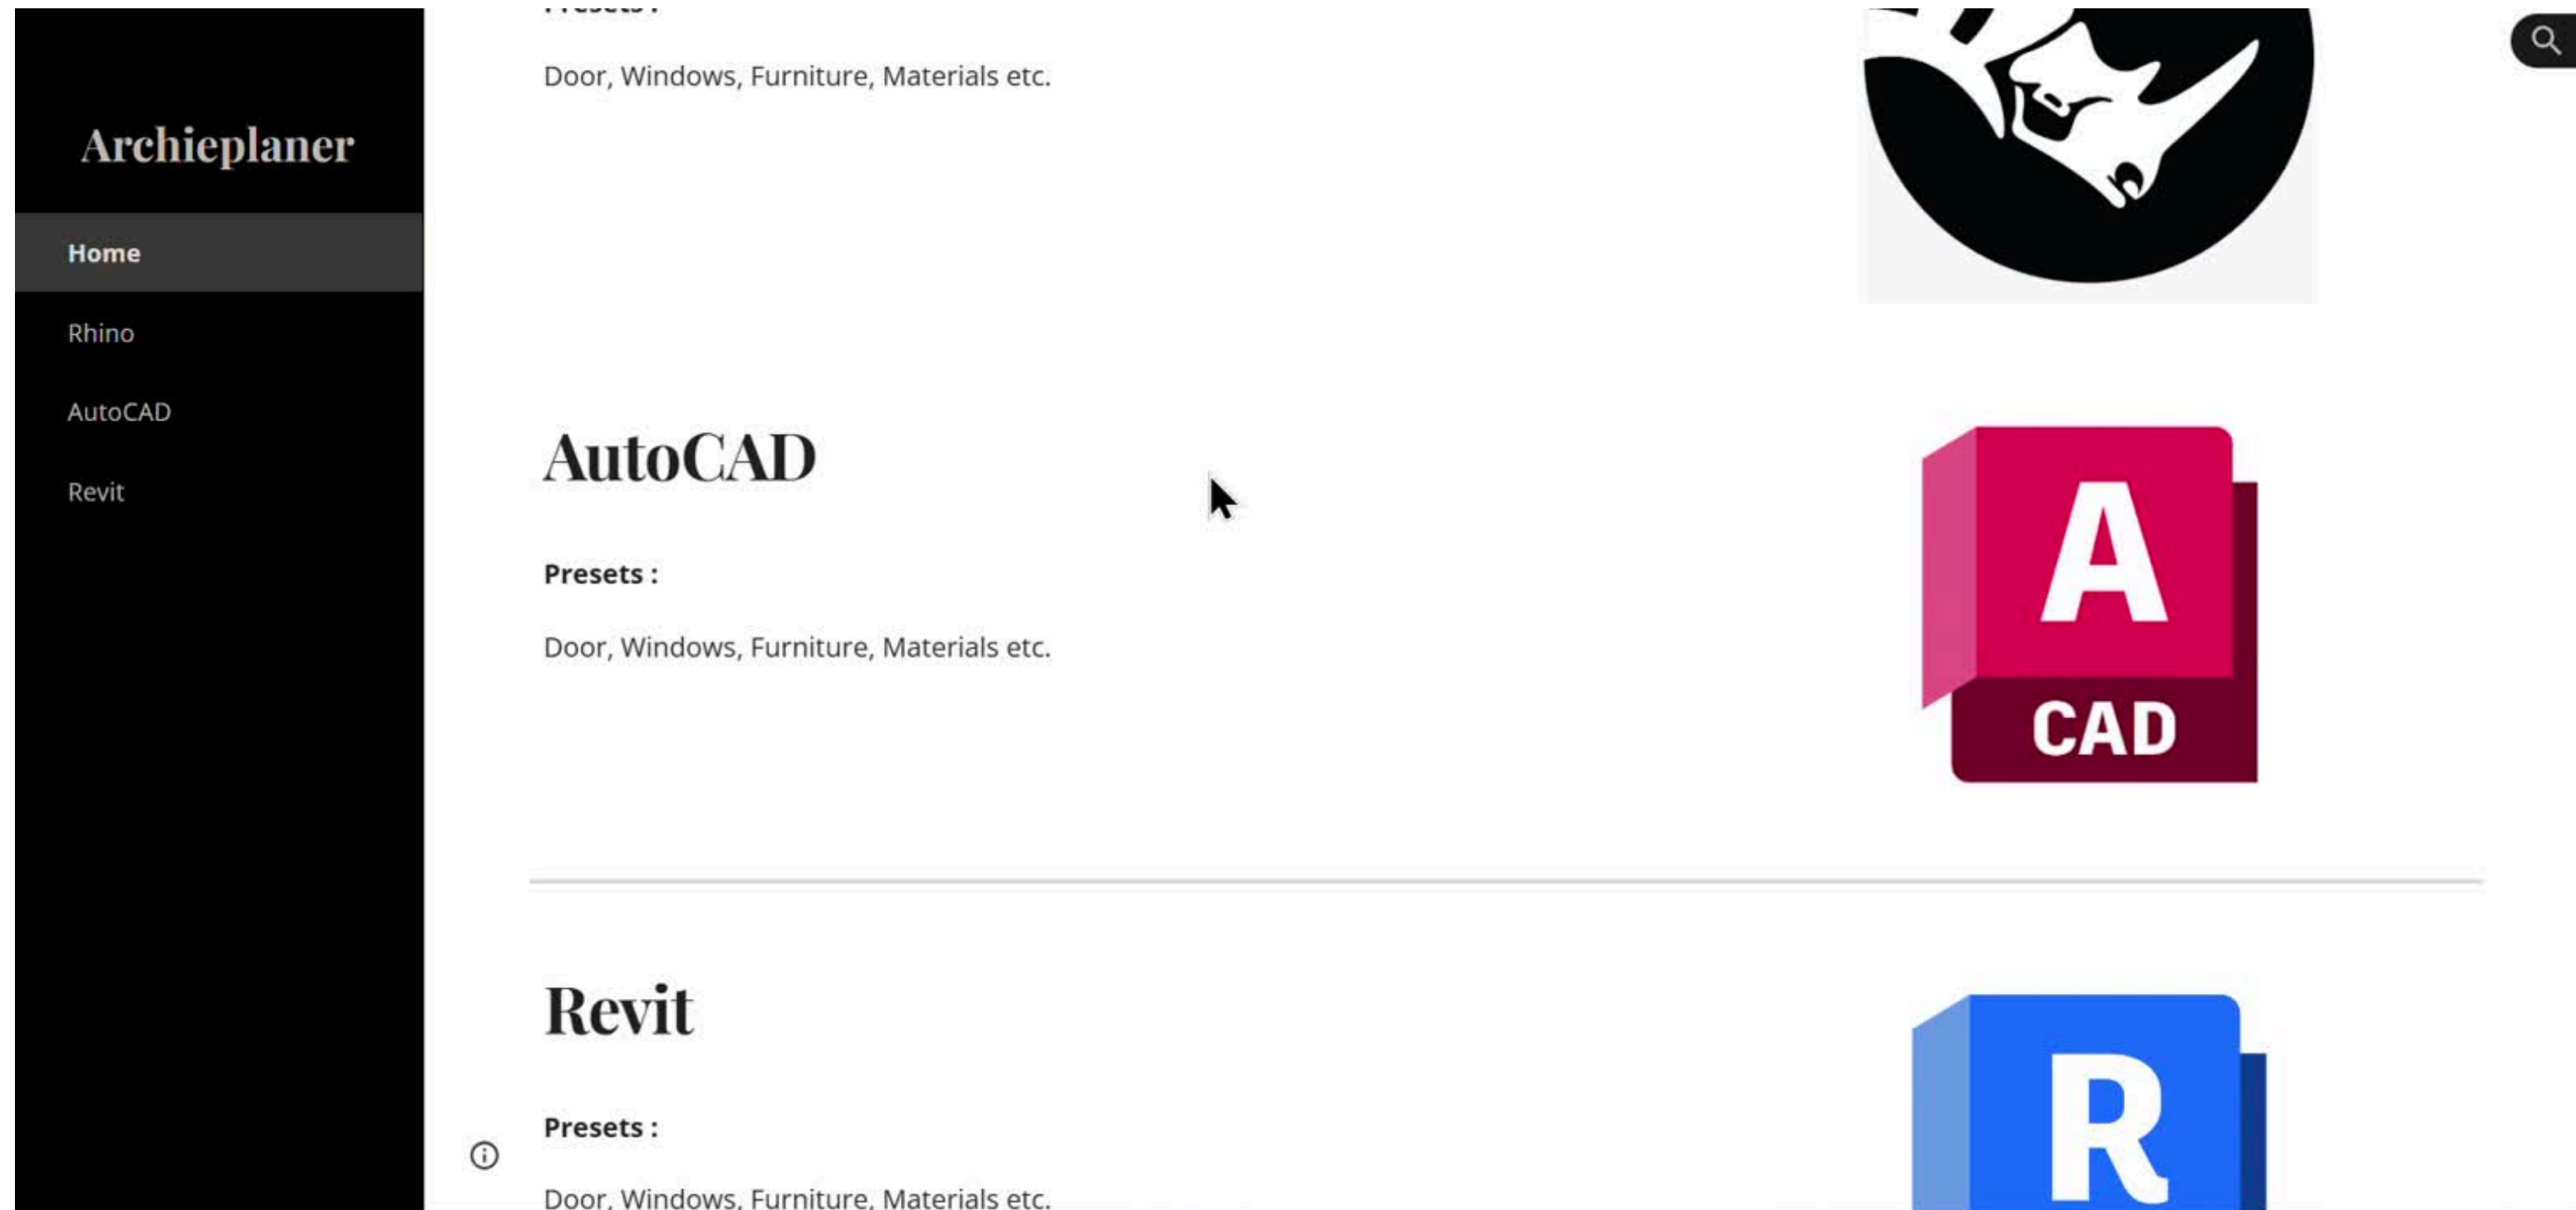

- Each program would have its web page dedicated to it and it would need the items to be listed
- Each Item listed would need
 - An image of the item listed
 - The details of the item
 - the downloadable link

02

Other Catalogs are available

- There are many different catalogs designed to help architecture students such as:
 - freeCADS.com
 - 3Dmodels.org
 - Turbosquid.com
- The biggest difference our website has from those listed above are:
 - All the Reference materials will be free
 - Also, offer references from multiple programs

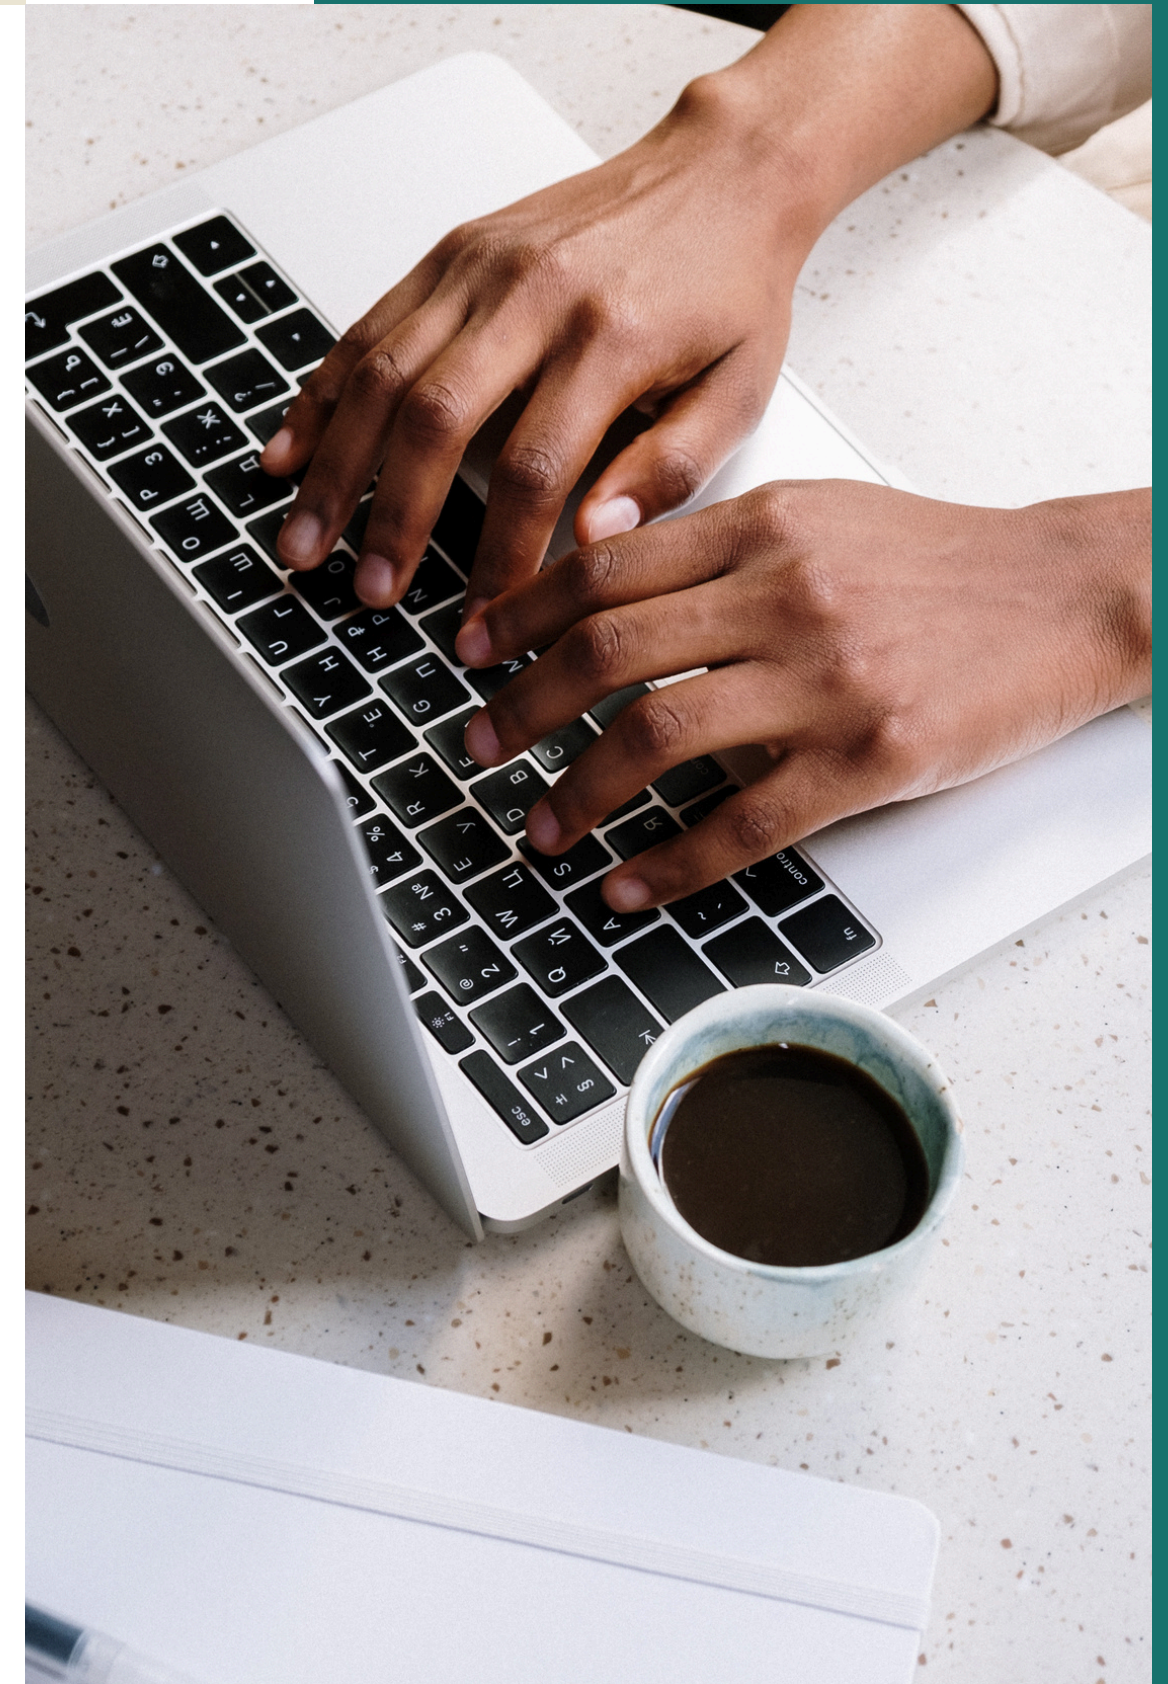

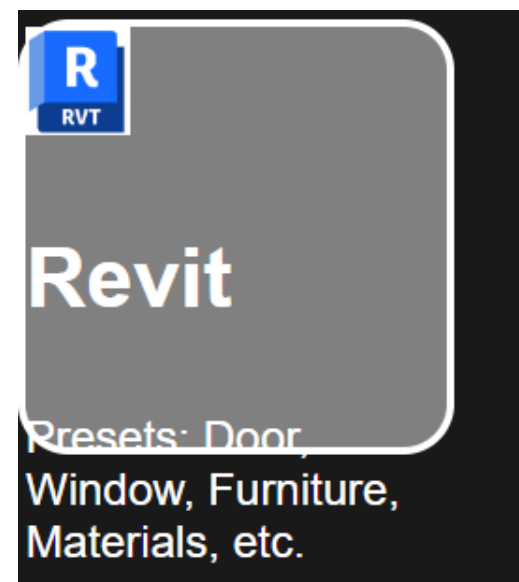

WEBSITE MOCKUP

WHAT PROBLEMS WE FACE

1. Perfect CSS code
 - Ensure that the layout is responsive and test it
2. Communication
 - We are now short a group member
3. Fixing images and implementing usability for each image
4. AutoCAD links are not working
5. Other links stop working after a while.
